

Downtown Construction + Transportation Update

March 2020

Downtown Phoenix is growing

In addition to a brand new five-mile light rail extension connecting the Downtown core with South Phoenix, there are 4,134 housing units, 440 hotel rooms, and 50,000 square feet of office space under construction.

How to get around

Businesses, residences and garages will be accessible during construction, sometimes with modifications. Bike lanes and pedestrian walkways will also be maintained, with minor light rail schedule changes. For car commuters, consider taking 7th Avenue north and southbound, Van Buren or Monroe streets east and westbound.

South Central Extension/ Downtown Hub

Project App: Construct VM

Office: 5040 S. Central Ave.
